- **Programming Languages** – JavaScript, Python, R, Java, Dart, C++
 - **Web Development Tools** – HTML, CSS
 - **Web Frameworks & Libraries** – React, Redux, Tailwind CSS, Bootstrap
 - **Mobile Frameworks** – React Native
 - **Other Tools** – Figma, Git, VS Code
 - **Other Skills** – Responsive Web Design, Web Performance Optimization, Debugging
-

PERSONAL PROJECTS

Real Time News Website Project

- Design and develop responsive news website aggregating news from Canada, USA, and UK using a News API. Implemented features like search, category selection, and live updates to enhance user experience.
- Implemented lazy loading for faster content loading and infinite scroll for efficient content loading as well seamless browsing.

Real Estate Web Application

- Developed a responsive real estate web app using React.js and Tailwind CSS, created 20+ reusable components to ensure scalability and maintainability.
- Implemented dark mode with a scrollable icon for user customization, enhancing UI/UX design.

JobConnect Full Stack Project

- Built a platform where recruiters can post jobs, manage company profiles, and review student applications, while students can browse and apply for jobs, as well as manage their profiles.
 - Built the frontend using React and Vite for fast builds, incorporating ShadCN UI for modern and user centric design. Used Redux Toolkit for state management and implemented Framer Motion for smooth animations.
 - Set up the backend with Node.js and Express.js, integrated MongoDB for data storage, and created RESTful APIs for job listings, applications, and company management. Implemented user authentication with role based access for recruiters and students.
-
